1. Technical information

Disc magnet Ø 5 mm, height 5 mm, holds approx. 100 g, ferrite, Y35, no coating

Article ID	FE-S-05-05
EAN	7640155431972
Material	Ferrite
Shape	Disc
Diameter	5 mm(+/- 0,1 mm)
Height	5 mm(+/- 0,1 mm)
Direction of magnetisation	axial (parallel to height)
Coating	No coating
Manufacturing method	sintered
Magnetisation	Y35
Strength	approx. 100 g (approx. 0,981 N)
Displacement force	approx. 20 g (approx. 0,196 N)
Max. working temperature	250°C
Colour	Grey
Weight	0,4761 g
Curie temperature	450 °C
Residual magnetism Br	4000-4100 G, 0.40-0.41 T
Coercive field strength bHc	2.20-2.45 kOe, 175-195 kA/m
Coercive field strength iHc	2.26-2.51 kOe, 180-200 kA/m
Energy product (BxH)max	3.8-4.0 MGOe, 30.0-32.0 kJ/m ³

Product compliant with the latest European RoHS directive.

Product compliant with the latest European REACH regulation.

2. Safety tips

<p>Danger</p> 	<p>Swallowing</p>
	<p>Children could swallow small magnets. If several magnets are swallowed, they could get stuck in the intestine and cause perilous complications.</p>
	<p>Magnets are not toys! Make sure that children don't play with magnets.</p>

Danger 	Electrical conductivity Magnets are made of metal and conduct electricity. Children might try to put magnets into a power outlet and thereby suffer from an electric shock. Magnets are not toys! Make sure that children don't play with magnets.
--	--

3. Handling and storing

Caution 	Magnetic field Magnets produce a far-reaching, strong magnetic field. They could damage TVs and laptops, computer hard drives, credit and ATM cards, data storage media, mechanical watches, hearing aids and speakers. <ul style="list-style-type: none"> • Keep magnets away from devices and objects that could be damaged by strong magnetic fields. • Please refer to our table of recommended distances: www.supermagnete.fi/faq/distance
---	--

Notice 	Influence on people According to the current level of knowledge, magnetic fields of permanent magnets do not have a measurable positive or negative influence on people. It is unlikely that permanent magnets constitute a health risk, but it cannot be ruled out entirely. <ul style="list-style-type: none"> • For your own safety, avoid constant contact with magnets. • Store large magnets at least one metre away from your body.
--	---

Notice 	Temperature resistance Ferrite magnets can be used at temperatures between -40°C and 250°C. At lower and higher temperatures they lose part of their adhesive force permanently. Don't use ferrite magnets in places where they are exposed to temperatures below -40°C or above 250°C.
---	---

Notice 	Mechanical treatment Ferrite magnets are brittle. When drilling or sawing a magnet with improper tools, the magnet may break. Stay away from mechanical treatment of magnets if you do not possess the necessary equipment and experience.
--	--

4. Transportation tips

Caution 	Airfreight Magnetic fields of improperly packaged magnets could influence airplane navigation devices. In the worst case it could lead to an accident. <ul style="list-style-type: none"> • Airfreight magnets only in packaging with sufficient magnetic shielding. • Please refer to the respective regulations: www.supermagnete.fi/faq/airfreight
---	---

Caution 	Postage Magnetic fields of improperly packaged magnets could cause disturbances in sorting machines and damage fragile goods in other packages. <ul style="list-style-type: none"> • Please refer to our shipping tips: www.supermagnete.fi/faq/shipping • Use a large box and place the magnet in the middle surrounded by lots of padding material. • Arrange magnets in a package in a way that the magnetic fields neutralise each other. • If necessary, use sheet iron to shield the magnetic field. • There are stricter rules for airfreight: Refer to the warning notice "Airfreight".
---	---

TARIC-Code: 8505 1910 90 0

Origin: China
